

The Lakhovsky Multiple Wave Oscillator Handbook

**Comprising the
Borderland Sciences Research Foundation
Lakhovsky Multiple Wave Oscillator
&
Radio-Cellular Oscillator
Research Files**

**Compiled and Edited by
Thomas J. Brown
Executive Director of
Borderland Sciences Research Foundation**

**Published May 31, 1992
in the Light of further research,
in the interests of BSRF Associates by:**

P.O. BOX 429 ★ GARBerville, CA 95440-0429 ★ U.S.A.

DISCLAIMER

This book is a research publication of Borderland Sciences Research Foundation. It consists of our MWO and RCO files which have been put into some semblance of order to preserve the records of many people with new and different ideas on how to study the energetic states of living systems and how these systems may be influenced by externally applied energies, and also to allow for further experimentation in this field by competent researchers. Read this book thoroughly before undertaking any experiments because you will find many different opinions, some conflicting, as to how to proceed. High frequency electrical apparatus can cause serious shock injury and should only be handled by knowledgeable, competent people. All experiments are conducted solely at your own risk. We disclaim any responsibility for the use or misuse of any information in this book. While this book touches on the subject of human health, all information should be considered as anecdotal and should not in any way be construed as medical advice. We are not qualified to give medical advice and the use of the experimental equipment and research techniques described in this book may provide a false sense of security wherein one may neglect professional medical care. Use your brains. Thanks.

Tom Brown
