 Did you know that 30 years ago Dr Hardin B. Jones, Professor of Medical Physics & Physiology at Berkeley, found that the life expectancy of untreated cancer cases appears to be FOUR TIMES LONGER than that of treated individuals?

1969 Science Writers Conference of the ACS

 Chemotherapy is effective in only 2 to 4% of cancers----Hodgkin's disease, Acute Lymphocytic Leukemia (ALL, childhood leukemia), Testicular cancer, and Choriocarcinoma?

Ralph Moss interview 1995
<http://www.livelihoods.com/sumeria/canc/rmoss.html>

 There is no scientific evidence for chemotherapy being able to extend in any appreciable way the lives of patients suffering from the most common organic cancers, which accounts for 80% of all cancers? (Dr Ulrich Abel. 1990)

 Chemotherapy drugs are of benefit to at most 5% of cancer patients they are given to, but are routinely given to 50% of patients?

John Cairns of Harvard in Scientific American

 75 % of oncologists, in one survey, said if they had cancer they would not participate in chemotherapy trials due to its "ineffectiveness and its unacceptable toxicity"?

 Grouped together, the average cancer patient has a 50/50 chance of living another 5 years; which are the same odds he or she had in 1971?

 With some cancers, notably liver, lung, pancreas, bone and advanced breast, our 5 year survival from traditional therapy alone is virtually the same as it was 30 years ago?

After \$50 Billion spent on cancer research, the list of cancers responsive to chemotherapy is almost identical to what it was 25 years ago?
Questioning Chemotherapy by Ralph Moss, p81

the War on Cancer is a failure with a death rate not lower but 6% higher in 1997 than 1970?

Did you know that one of the worlds leading nuclear medical scientist, John Gofman M.D.,Ph.D. found that past exposure to ionizing radiation, primarily medical x-rays (eg mammograms), is responsible for about 75 percent of the breast-cancer problem today?
<http://ratical.co/radiation/CNR?PBC/Overview.htm>

Radiation therapy does not improve the survival of patients with breast cancer !

Did you know that the mortality rate for breast cancer in women over 55 was about 20% higher in 1995 than in 1970 (so much for mammograms)? (Irwin D. Bross, Ph.D.)

Did you know that two large studies found an increase in mortality of women (under 55) from breast cancer who were regularly screened with mammograms?
